

Job Description:
Avionics Technician

Lancair Avionics, Inc. is searching for an Avionics Technician to assemble, wire, test, and installs avionics panels for Lancair and other experimental aircraft.

Qualifications:

Applicants should be proficient in FAA wiring procedures and acceptable industry standards. They will demonstrate exceptional attention to detail in both wiring and building avionics panels. Fiberglass experience is a plus.

Highly Qualified Candidates:

- Experience and training in electronics technology and avionics (2 year degree), and/or
- AHS in Advanced Electronics Technology/Avionics
- Experience in building instrument panels and wiring aircraft, or
- Equivalent military experience in avionics/aircraft electronics

Duties:

Avionic Technicians are expected to develop and maintain professional relationships with customers and be a good team player. They assist other technicians when needed. Technicians will be required to install, wire and troubleshoot on board different experimental aircraft.

Lancair offers a benefit package that includes medical coverage and a company 401k program. If you wish to be considered for this opening, please fax to (541) 923-2255 or drop off resume at Lancair 2244 Airport Way Redmond, OR 97756 to express your interest and to present your qualifications. Please, no phone calls.
